

# The ICE 2.4

## *Interchangeable Component Eyeshield*

The **ESS ICE 2.4** offers an excellent value for any command that needs a high-performance eyeshield system that provides ballistic impact protection, all-day comfort, and interchangeable lenses for quick adaptation to any light condition.

| Features      | Description  |
|---------------|--|
| <b>Lenses</b> | The <b>ICE 2.4</b> includes a set of 3 extra-thick, 2.4mm polycarbonate high-impact lenses (clear, smoke gray, and amber). Lenses feature the ESS <b>Tough Zone™</b> lens coating for maximum durability and scratch resistance. All lenses provide a high level of anti-fragmentation protection, and can even stop a shotgun blast from a distance of 35 feet. <b>V50 impact rating: 823ft. / sec (.17 cal).</b> |
| <b>Vision</b> | Flawless optical clarity for distortion-free vision. Uninhibited peripheral vision.  |
| <b>Frame</b>  | The “frameless” design provides an unlimited field of vision. Temple lengths are adjustable, and have bendable earpieces to fit every user. Nosepiece accepts an Rx adapter.   |
| <b>Extras</b> | Comes standard with: 3 lenses, a tough protective case with belt loops and equipment clip, a neck leash, and an anti-fog cloth.  |

| Accessories               | Description   |
|---------------------------|---|
| <b>Rx insert</b>          | The <b>ICE Rx Lens Carrier</b> snaps into the <b>ICE 2.4</b> nosepiece for a low-profile, lightweight prescription integration. This versatile insert is <b>interchangeable with both ESS Profile NVG and ESS Advancer V-12 goggle systems.</b> |
| <b>Replacement lenses</b> | Thanks to <b>ESS Modular Technology™</b> , replacement lenses are inexpensive and easy to switch in/out of the eyeshield.   |
| <b>Laser lenses</b>       | Laser Protective Lenses (LPL)s are available.   |

**Full compliance with the following standards and regulations:**

- CE
