

# PROFILE NVG GOGGLE

Created with direction from US Special Forces groups, this state-of-the-art system has all the advantages of a compact, night-vision-compatible goggle design without sacrifices in dust filtration, field of view, impact protection or anti-fog performance.

Features	Description
<b>Lenses</b>	The <b>Profile NVG</b> includes both clear and smoke gray 2.8mm polycarbonate high-impact lenses. <b>ESS Clear Zone™</b> dual coating provides exceptional anti-fog resistance on the inside of the lens and extra-tough scratch protection on the outside. All lenses provide 100% UVA/UVB protection. V50 impact rating: 727 ft. / sec. (.22 cal).
<b>Vision</b>	Wide frame design affords an exceptionally broad field of view. Precise optical clarity provides distortion-free vision.
<b>Frame / Strap</b>	Low-profile design is compatible with night vision systems. Full-perimeter ventilation provides maximum anti-fog performance and dust filtration. Soft frame material conforms to any face shape. The durable smooth interface is easy to clean and maintain. 35mm wide wrap-around strap adjusts quickly and easily.
<b>Extras</b>	A soft cloth pouch for the extra lens and a durable goggle case come standard with all models. Available with or without <b>Stealth Sleeve™</b> , which eliminates glint off the lens and keeps the goggle clean and scratch-free when not being worn.

Accessories	Description
<b>Tear-off lenses</b>	Increase longevity of the primary lens and instantly restore clear vision when removed. Great in dirty, dusty environments.
<b>Replacement lenses</b>	Thanks to <b>ESS Modular Technology™</b> , replacement lenses are inexpensive & easy to switch in/out of the goggle. Available in Clear, Gray, Amber & Dual Thermal.
<b>Laser lenses</b>	Laser Protective Lenses (LPL)s are available.
<b>Rx insert</b>	Rx lenses are fit by an optometrist into the <b>ESS Rx Carrier</b> , which then easily snaps inside the goggle frame. <b>This insert can also be used with the ICE 2.4 Eyeshield.</b>
